

SATRIA PINANDITA ABYATARSYAH

+6287718609257 | satriapinanditaabyatarsyah@gmail.com | linkedin.com/in/satriapinan

Full Stack Engineer with 3 years of experience in frontend-focused enterprise development using React.js, Next.js, TypeScript, and Vite, complemented by hands-on full stack exposure through freelance work and self-driven projects using Node.js, Java Spring Boot, and Go. Experienced in micro-frontend architecture, REST API integration, and delivering high-performance, maintainable applications across cross-functional teams.

Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Material UI, Angular, Vue
- **Backend:** Node.js (Express), Nest.js, Java Spring Boot, Go, Codelgniter, ASP.NET Core
- **Database:** PostgreSQL, MySQL, MongoDB
- **State Management:** Zustand, Redux, TanstackQuery
- **Tools & Architecture:** Git, GitLab, Figma, Microservices, REST API, WebSocket (Socket.io)
- **Soft Skills:** Collaboration, Problem Solving, Creativity, Growth Mindset, Attention to code quality
- **Language:** Indonesian, English

Work Experience

Pancaran Group | Jakarta May 2026 - Present
Full Stack Engineer (Frontend-Focused)

- Led the analysis and digitalization of end-to-end logistics business processes, translating operational requirements into scalable solutions for Pancaran's SuperApp platform.
- Designed and developed core logistics modules such as Route Planning, Shipment Tracking, Order Management, and operational monitoring systems using React, TypeScript, and modern frontend technologies.
- Collaborated with operations, business, product, and engineering teams to align application features with real-world logistics workflows and organizational objectives.
- Designed UI/UX flows and user experiences focused on improving efficiency, usability, and adoption across both field and office operations.
- Integrated workflow automation and business process orchestration using Camunda while contributing to backend services, API integrations, and overall system architecture.

PT Padepokan Tujuh Sembilan | Bandung & Jakarta Sep 2023 - May 2026
Software Engineer (Frontend-Focused)

- Delivered enterprise-scale web applications (government, banking, insurance) using React, Next.js, TypeScript, and Vite across monolithic and micro-frontend architectures.
- Architected micro-frontend foundation using Vite Federation, enabling independent deployments and reducing cross-team dependencies.
- Improved performance and data consistency by implementing TanStack Query, Zustand, Redux, and optimized API integration strategies.
- Enhanced application performance and security via bundle optimization, compression, and code obfuscation.
- Collaborated in Agile/Scrum teams with backend, DevOps, and stakeholders to deliver production-ready, high-impact features.
- Expanded full stack capabilities through self-driven projects and internal tools using Node.js, Java Spring Boot, and Go — covering backend services, RESTful APIs, and microservices.

Freelance | Bandung Apr 2023 - Jan 2025
Full Stack Engineer

- Built a full-stack virtual physics lab platform using React, Vite, Express.js, and MySQL to enable interactive simulations for remote learning.
- Developed and integrated RESTful APIs to ensure reliable data flow between frontend, backend, and simulation modules.
- Integrated AI-enhanced PhET-based simulations into the platform, enabling seamless interaction within the web application.
- Optimized frontend performance and rendering efficiency for interactive simulations, improving responsiveness.
- Owned end-to-end delivery, from UI prototyping (Figma) to development, integration, and deployment.

Education

Universitas Pendidikan Indonesia | Bandung Sep 2020 - Feb 2025
Bachelor of Computer Science, 3.79 / 4.00

Organizational Experience

Team Leader | KKN Tematik UPI Jul 2023 - Aug 2023
Head of Aspiration Division | DPM Keluarga Mahasiswa Komputer UPI Jan 2022 - Jan 2023

Project Highlights

Pancaran Hub Pancaran Group Frontend Engineer Tech: React.js, TypeScript, Vite, Micro-frontend, Zustand, Tanstack Query, React Hook Form, Material UI, OAuth 2.0 Designed and developed enterprise-scale logistics applications within Pancaran's SuperApp ecosystem, translating business processes into modular micro-frontend solutions while improving operational visibility, workflow efficiency, and user experience.	May 2026 - Present
Pet Store Learning Project Full Stack Engineer Tech: Go, Angular, React.js, Vue.js, Vite, Vitest Demonstrated full stack versatility by migrating a frontend application across Angular, React, and Vue.js while engineering a custom Go backend with JWT authentication — showcasing adaptability across frameworks and architecture layers.	Mar 2026 - Apr 2026
Layanan Perizinan LNSW PT NashTa Global Utama Professional Frontend Engineer Tech: React.js, TypeScript, Vite, Micro-frontend, Zustand, Tanstack Query, React Hook Form, Material UI, OAuth 2.0 Unified two separate licensing platforms into a single micro-frontend ecosystem under SINSW Gen-II, improving service consistency and scalability for national single window operations using Vite Federation and OAuth 2.0 SSO.	Aug 2025 - Mar 2026
SIAP (Sistem Informasi Asuransi Pertanian) PT Asuransi Jasa Indonesia Professional Frontend Engineer Tech: Next.js, TypeScript, Zustand, Tanstack Query, React Hook Form, Material UI, Google Authentication Led frontend architecture setup for a modernized agricultural insurance system, establishing scalable project structure, authentication flow, and development standards that accelerated team onboarding and long-term maintainability.	Jul 2025 - Aug 2025
ACI Phase 3 PT Telkom Indonesia Tbk Professional Frontend Engineer Tech: React.js, JavaScript, Vite, Material UI, Rsuite, Interact.js Strengthened enterprise assessment security and digitized end-to-end procurement workflows, including migration to Vite for improved build performance and interactive drag-and-drop procurement scheduling.	Dec 2024 - May 2025
SIJEPE (Sistem Informasi Jasa Profesi) PT Bank BJB Syariah Professional Frontend Engineer Tech: React.js, JavaScript, Vite, Redux, React Hook Form, Material UI, Chart.js, CryptoJS Improved operational transparency for professional service workflows by delivering a monitoring system with real-time claim tracking, restructuring visibility, and certificate issuance management — backed by data visualization and client-side encryption.	Sep 2024 - Dec 2024
SimpleChat Learning Project Full Stack Engineer Tech: Next.js, Nest.js, Socket.io, MongoDB, Tailwind CSS, JWT, bcrypt Built a fully functional real-time messaging application end-to-end, integrating WebSocket communication, secure authentication, and persistent chat storage — demonstrating full stack ownership from UI to backend.	Aug 2024 - Aug 2024
Asuransi Kendaraan Bermotor PT Asuransi Jasa Indonesia Professional Frontend Engineer Tech: React.js, JavaScript, Vite, Redux, React Hook Form, Material UI, Ant Design Streamlined motor vehicle insurance claim processing by delivering a multi-stakeholder portal that connected insurers, customers, workshops, and surveyors — enabling real-time status updates across the claim lifecycle.	Apr 2024 - Aug 2024
Food Order Learning Project Backend Engineer Tech: ASP.NET Core, Java Spring Boot, PostgreSQL, JWT, MinIO Developed a secure and scalable food order management backend with dual-framework implementation in ASP.NET Core and Java Spring Boot, covering authentication, file storage, and structured API design.	Feb 2024 - Feb 2024
ACI Phase 2 PT Telkom Indonesia Tbk Support Frontend Engineer Tech: React.js, JavaScript, Vite, Material UI, Rsuite Contributed to the foundation of a secure enterprise assessment platform by implementing UI components and integrating frontend with backend services to support procurement and assessment workflows.	Nov 2023 - Feb 2024
Locomotive Simulation System Learning Project Full Stack Engineer Tech: React.js, Node.js, Java Spring Boot, MongoDB, MySQL, Kafka, TelegramBots, Microservices	Nov 2023 - Nov 2023

Engineered a microservices-based real-time simulation system with automated Telegram reporting and a live dashboard, demonstrating event-driven architecture using Kafka across distributed services.

Talent Center | Learning Project

Oct 2023 - Nov 2023

Full Stack Engineer

Tech: React.js, Java Spring Boot, PostgreSQL

Built a talent sourcing platform from scratch with separate client and admin interfaces, delivering end-to-end ownership across frontend and backend in a monolithic architecture.

VLab (Virtual Laboratory) | Doctoral Student Universitas Pendidikan Indonesia | Professional

Apr 2023 - Jan 2025

Full Stack Engineer

Tech: React.js, Express.js, MySQL, Figma

Delivered a full-stack virtual physics laboratory that bridged the gap between physical labs and online learning, enabling students to conduct interactive PhET-based simulations remotely.
