

SATRIA PINANDITA ABYATARSYAH

+6287718609257 | satriapinanditaabyatarsyah@gmail.com | linkedin.com/in/satriapinan | satriapinan.github.io

Full Stack Engineer with 3 years of experience building enterprise web applications. I am comfortable handling various frontend projects, from standard web apps to complex micro-frontends (React, TypeScript, Vite). I also have a solid full-stack foundation and consider myself a fast learner. I actively explore and apply backend technologies (Node.js, Spring Boot, Microservices) to solve technical problems and help teams deliver products faster. Highly adaptable and always ready to learn new tools to support the team.

Skills

- **Languages:** TypeScript, JavaScript, Java, Go
- **Frontend:** React.js, Next.js, Vite, Tailwind CSS, Material UI
- **Backend:** Node.js (Express), Java Spring Boot
- **Database:** PostgreSQL, MySQL, MongoDB
- **Architecture:** Micro Frontend (Vite Federation), Microservices, REST API, SSE, OAuth 2.0, WSO2
- **Tools & DevOps:** Git, GitLab, CI/CD, Docker, Figma
- **Testing:** Vitest
- **Spoken Languages:** Indonesian, English

Work Experience

Pancaran Group | Jakarta

May 2026 - Present

Full Stack Engineer

- Developed and delivered frontend solutions for enterprise logistics applications using React.js, TypeScript, Zustand, React Hook Form, and TanStack libraries, contributing to modules such as Route Planning and Shipment Tracking.
- Designed and implemented a Vite Federation-based micro-frontend architecture, enabling independent development and deployment across multiple frontend modules while improving application scalability and maintainability.
- Implemented OAuth 2.0 authentication with WSO2 and Server-Sent Events (SSE) for real-time shipment tracking, enabling secure authentication and real-time operational visibility across logistics applications.
- Partnered with DevOps engineers to establish and optimize GitLab CI/CD pipelines and Docker-based deployment workflows, reducing deployment friction and supporting reliable release cycles.

PT Padepokan Tujuh Sembilan | Bandung & Jakarta

Sep 2023 - May 2026

Software Engineer

- Delivered enterprise web applications across government, banking, and insurance sectors using React.js, Next.js, TypeScript, and Vite.
- Architected and implemented a micro-frontend ecosystem with Vite Federation, enabling independent deployments, improved code modularity, and scalable collaboration across development teams.
- Enhanced frontend architecture by leveraging TanStack Query, Zustand, and React Hook Form while optimizing REST API integration strategies to improve maintainability and application responsiveness.
- Collaborated closely with backend engineers and DevOps teams in Agile/Scrum environments, contributing to REST API design, frontend-backend integration, and full-stack development using Node.js, Spring Boot, and Go.

PT Arutala Mitra Mandiri | Remote

Aug 2025 & Aug 2026

React.js Certification Mentor (Part-time)

- Mentored beginner-level participants in a React.js certification program, delivering structured training on React fundamentals, hooks, routing, state management, and modern frontend development.
- Guided participants in building practical React applications while providing code reviews and technical feedback to improve code quality and problem-solving skills.
- Facilitated interactive discussions and troubleshooting sessions to strengthen participants' understanding of real-world React development.

Freelance | Bandung

Apr 2023 - Jan 2025

Full Stack Engineer

- Built and delivered a full-stack virtual physics laboratory platform using React.js, Vite, Express.js, and MySQL.
- Designed and developed RESTful APIs connecting frontend simulation modules with backend services, enabling seamless integration of AI-enhanced PhET-based simulations.
- Managed the complete software development lifecycle, from UI prototyping and application development to deployment and frontend performance optimization.

Education

Universitas Pendidikan Indonesia | Bandung

Sep 2020 - Feb 2025

Bachelor of Computer Science, 3.79 / 4.00

Project Highlights

Mobo Hub Pancaran Group Frontend Engineer Tech: React.js, TypeScript, Vite, Micro-frontend, OAuth 2.0, WSO2, SSE, GitLab CI/CD, Docker Consolidated satellite websites into a single, modular web using microfrontend architecture. Architected and built core logistics features, including route planning, real-time tracking, monitoring, and more, to streamline operations and enhance system scalability.	May 2026 - Present
Pet Store Cross-Framework Architecture Research (Proof of Concept) Full Stack Engineer Tech: Go, Angular, React.js, Vue.js, Vite, Vitest Demonstrated technical agility by engineering a unified backend service (Go/Node.js) and successfully integrating it across multiple frontend frameworks (React, Angular, Vue) to analyze performance trade-offs, state management differences, and build optimization.	Mar 2026 - Apr 2026
Layanan Perizinan LNSW PT NashTa Global Utama (via PT Padepokan Tujuh Sembilan) Frontend Engineer Tech: React.js, TypeScript, Vite, Micro-frontend, Zustand, Tanstack Query, React Hook Form, Material UI, OAuth 2.0 Unified two licensing platforms into a scalable micro-frontend ecosystem for Indonesia's National Single Window (SINSW), simplifying system maintenance and supporting nationwide import/export licensing services.	Aug 2025 - Mar 2026
SIAP (Sistem Informasi Asuransi Pertanian) PT Asuransi Jasa Indonesia (via PT Padepokan Tujuh Sembilan) Frontend Engineer Tech: Next.js, TypeScript, Zustand, Tanstack Query, React Hook Form, Material UI, Google Authentication Designed and established the initial frontend project architecture and authentication flows for an agricultural insurance platform, providing a foundation for ongoing development by the team.	Jul 2025 - Aug 2025
ACI Phase 3 PT Telkom Indonesia Tbk (via PT Padepokan Tujuh Sembilan) Frontend Engineer Tech: React.js, JavaScript, Vite, Material UI, Rsuite, Interact.js Modernized an enterprise procurement platform by migrating the frontend to Vite, improving build performance while delivering complex assessment workflows, interactive cover-page layouting, and HTML-to-PDF generation features.	Dec 2024 - May 2025
SIJEPE (Sistem Informasi Jasa Profesi) PT Bank BJB Syariah (via PT Padepokan Tujuh Sembilan) Frontend Engineer Tech: React.js, JavaScript, Vite, Redux, React Hook Form, Material UI, Chart.js, CryptoJS Developed an internal insurance-related monitoring platform for banking operations, featuring claim tracking, reporting dashboards, and secure client-side data handling.	Sep 2024 - Dec 2024
Asuransi Kendaraan Bermotor PT Asuransi Jasa Indonesia (via PT Padepokan Tujuh Sembilan) Frontend Engineer Tech: React.js, JavaScript, Vite, Redux, React Hook Form, Material UI, Ant Design Built a multi-stakeholder vehicle insurance claim portal featuring Role-Based Access Control (RBAC), connecting insurers, customers, workshops, and surveyors with real-time claim status visibility.	Apr 2024 - Aug 2024
Food Order Backend Architecture Comparative Study Backend Engineer Tech: ASP.NET Core, Java Spring Boot, PostgreSQL, JWT, MinIO Engineered a core food order management API utilizing both Java Spring Boot and ASP.NET Core to conduct a hands-on comparative analysis of two major enterprise backend ecosystems.	Feb 2024 - Feb 2024
Locomotive Simulation System Event-Driven Microservices Architecture Study Full Stack Engineer Tech: React.js, Node.js, Java Spring Boot, MongoDB, MySQL, Kafka, TelegramBots, Microservices Engineered a microservices-based real-time simulation system with automated Telegram reporting and a live dashboard, demonstrating event-driven architecture using Kafka across distributed services.	Nov 2023 - Nov 2023
VLab (Virtual Laboratory) Doctoral Student Universitas Pendidikan Indonesia Full Stack Engineer Tech: React.js, Express.js, MySQL, Figma Built a full-stack virtual physics laboratory platform enabling remote interactive simulations through web-based learning experiences. Integrated AI-enhanced PhET simulations provided by colleagues to enhance the interactive learning platform.	Apr 2023 - Jan 2025
